

KlingonBlue™

Directions

1 Pour 45 L of water into a 200 L drum with half its lid removed

2 Insert the lance of a power washer and start the washer

3 Slowly add 1 bag (22.7 Kg) of KlingonBLUE® while continuing to agitate the water with the **power washer**

4 Fill the drum to 200L while continuing to agitate the water with the **power washer.**

5 **The vigorous agitation provided by the power washer is vital to ensure full benefit of the product. DO NOT SKIP THIS STEP!**

6 Pour mixed solution into emptied, cleaned foot bath.

Important Usage Notes

Use KlingonBlue once for two straight weeks and then every other week thereafter for approximately 100 cows.

If foot condition is very poor at the start of treatment, it should be used once per week until foot condition has improved.

When starting fresh treatment it is advised to place a small amount of organic matter ahead of foot bath to encourage usage and calm cows.

KlingonBlue™

Long-acting Footbath

Fight Digital Dermatitis - A Leading Cause of Lameness

KlingonBlue™ adheres to the feet of cows after a single passage through the solution and remains noticeable on their feet a day later. The product is especially well-adhered to digital dermatitis lesions.

Digital Dermatitis

- ▶ causes 53.9% of lameness in cows;
- ▶ causes 61.8% of lameness in bred heifers;
- ▶ is also known as hairy-heel warts or infectious lameness.
